How to create a link from your Webcampus class to your Ares reserves

While the instructor can always view Ares reserves from their Webcampus class a link needs to be created for Webcampus students to be able to view reserves. From your Webcampus class page click the plus + sign in the upper left corner then click “Tool Link”
Choose “Ares Course Reserves” from the drop down menu.
Name the link as desired. Check the “Available to Users” box to make the link available to students. Click “Submit”.
Clicking on the resulting link will lead the students (and faculty) directly to the Ares reserves (no second log in will be required).
